Codman®
BACTISEAL® Shunt Catheter

CONFIDENCE.

Purchase any Codman® Valve with a Codman BACTISEAL® Antimicrobial Impregnated Catheter System. If any part of the system requires a revision due to infection or component failure within one year of purchase, Codman will replace those components free of charge.

We are so confident in our system that we are willing to offer you this pledge for one year. Combine any Codman Valve with a BACTISEAL Catheter to create a unique and effective barrier to bacterial colonization on all catheter surfaces - you'll have a winning combination. We hope you never need to use our BACTISEAL Pledge, and judging by our track record, you probably NEVER WILL.

CODMAN VALVE + BACTISEAL = CONFIDENCE

BACTISEAL: Confidence by Design

Creates a unique, effective barrier to gram positive bacterial colonization on all catheter surfaces

Maintains the critical first month "shunt" implant vigil with two slow release antibiotics

Reduces the potential for colonization both in the catheter lumen and on its outer surface

Codman
SPECIALTY SURGICAL

A DIVISION OF INTEGRAL LIFESCIENCES

Codman®
BACTISEAL® EVD Catheter

CONFIDENCE.

Purchase a Codman® BACTISEAL® EVD Antimicrobial Impregnated Catheter with the AccuDrain® External CSF Drainage System. If any part of the system requires a revision due to infection or component failure, Codman will replace those components free of charge.

The AccuDrain External CSF Drainage System, with pinpoint hydrostatic leveling, provides clinicians with an easy-to-use, MRI conditional device. Combine it with the BACTISEAL EVD Catheter to create an effective barrier to gram positive bacterial colonization on catheter surfaces, and you'll have a winning combination. We hope you never need to use our Bactisal Pledge, and judging by our track record, you probably NEVER WILL.

BACTISEAL EVD + ACCUDRAIN = CONFIDENCE

BACTISEAL: Confidence by Design

Creates a unique, effective barrier to gram positive bacterial colonization on all catheter surfaces

Reduces the potential for colonization both in the catheter lumen and on its outer surface

Protects for up to 28 days with two, slow-release antibiotics

MEDIHONEY
Wound and Burn Dressing

PREPARE

Advanced Wound Care

Gel

100% Paste

HCS
(Hydrogel Cellular Sheet)

Calcium Alginate

MediHoney® Dressings

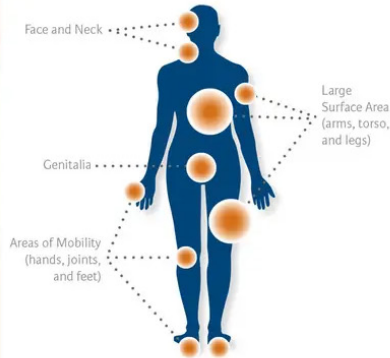

Aids and supports autolytic debridement and provides moist wound healing in acute and chronic wounds and burns¹⁻⁴

MediHoney® Dressings, made with Active *Leptospermum* Honey, offer versatility and demonstrated effectiveness when managing your patients' superficial to deep partial thickness burns⁵⁻⁹

Features & Benefits:

- Promotes a moisture-balanced wound environment conducive to wound healing in 1st and 2nd degree burns¹⁰
- Osmotic potential draws fluid through the wound, to the surface, helping to liquefy non-viable tissue
- MediHoney has a low pH of 3.5-4.5, lowering pH has been associated with wound healing benefits
- Supports the moist wound healing of deep partial thickness burns when you prefer not to graft*

MediHoney – Committed to bringing you quality, versatility and innovative solutions for your patients' care throughout the continuum.

INTEGRA
LIMIT UNCERTAINTY

*Cleared indications for use: 1st and 2nd degree burns.

MEDIHONEY
Wound and Burn Dressing

Advanced Wound Care

Hydrogel Sheet
(Non-Adhesive)

MediHoney Hydrogel dressing moist wound healing and exudate non-draining to lightly exuding wounds

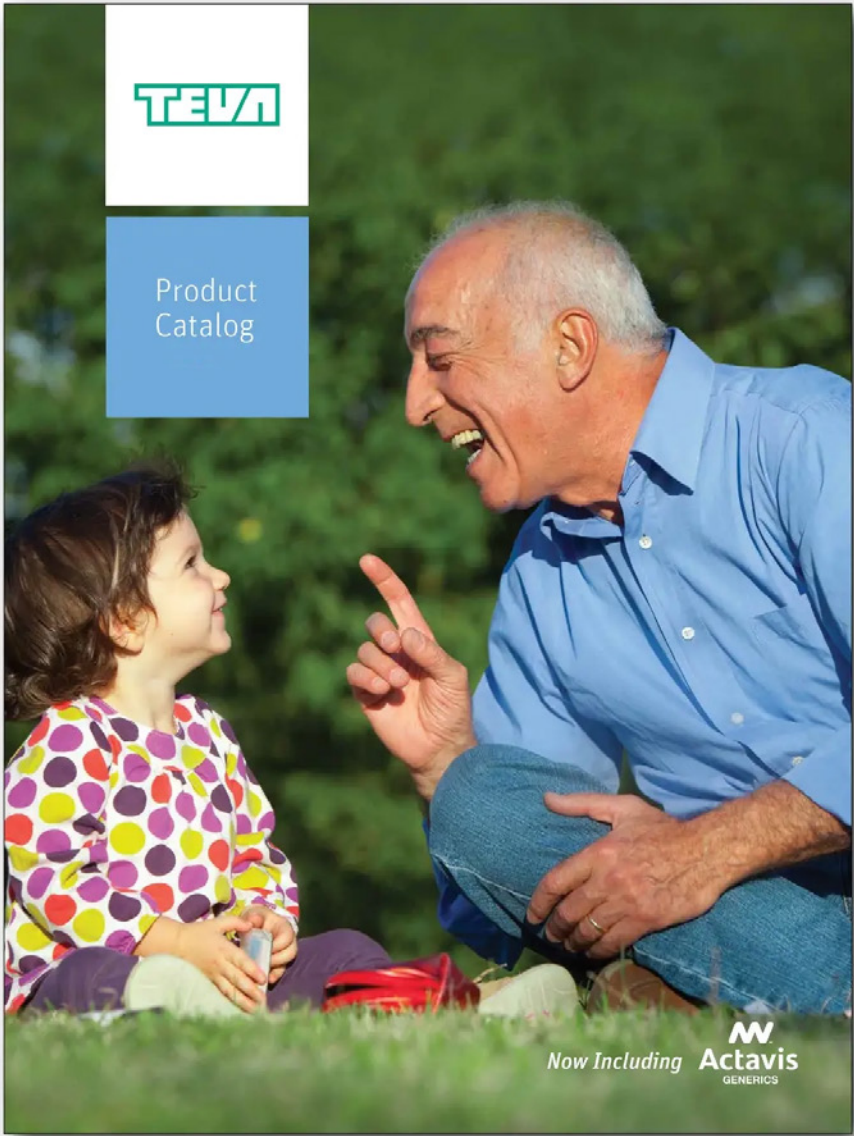

Features & Benefits:

- MediHoney aids and supports autolytic debridement and provides a moist wound healing environment in acute and chronic wounds and burns.¹⁰ This is done through High Osmolarity (Fig. 1) and Low pH (Fig. 2)
- MediHoney has a low pH of 3.5-4.5
- Super Absorbent Polymer technology provides high fluid handling capability
- Promotes a moisture-balanced wound environment conducive to wound healing in multiple wound types
- Transparent dressing offers visibility to wound bed
- Patients have reported a soothing and cooling effect upon application

MediHoney – Committed to bringing you quality, versatility and innovative solutions for your patients' care throughout the continuum.

TotalReward

For US Band D, E, L and P
Candidates

Your TotalReward at GSK Supporting your health, your wealth and your life

Welcome to GSK and TotalReward

As a part of GSK, you join a team of talented people who together and individually contribute to the company's global mission to improve the quality of human life by enabling people to do more, feel better and live longer.

It is the GSK Spirit, passion for innovation and achievement of our performance with integrity and an unrelenting sense of purpose that helps us to achieve the mission and attain our goal to be the most valuable leader in our industry.

Your Total Cash

Highlights

- Your Total Cash consists of base salary, an annual performance-based bonus and recognition programs.
- Any annual bonus and base salary increase are announced on Total Cash Reward Day in March.

Performance and Development Planning process

GSK's Performance and Development Planning (PDP) process is designed to give you clear objectives and development opportunities for the year, and to provide your manager with a basis for evaluating your individual performance at the end of the year.

Recognition programs

Each business unit has a company-sponsored program that recognizes superior performance that significantly exceeds the level of performance of GSK at the individual, team, department and division level, as well as for behaviors that support, lead and reinforce the GSK Spirit.

Recognition under TotalReward

Recognition under TotalReward provides cash awards from \$75 to \$7,500, depending on the contribution to the business.

How your individual performance influences your Band D

The amount of bonus you actually receive will depend on your performance. Your manager reviews your performance and the Performance and Development Planning (PDP) process your individual performance multiplier (IPM), which can range from 0.75 to 1.25. An IPM in the region of 1.00 is considered good.

Band E, L and P

The amount of bonus you receive depends entirely on your business unit.

How your bonus is calculated Band D

Your bonus is calculated as: Bonus opportunity % x IPM x base salary

Band E, L and P

Your bonus is calculated as: bonus opportunity % x (base salary plus any actual overtime and/or shift pay)

Actual bonus payment in March

For the previous year:

Your contribution to helping GSK deliver innovative medicines and health care products that help millions of people live longer, healthier and happier lives is rewarded through your Total Cash.

Pay for performance and a share in GSK's success are key principles of Total Cash. The programs that make up your Total Cash are designed to:

- motivate the achievement of business objectives
- reward your individual and team contributions to GSK's performance
- provide competitive Total Cash opportunities.

GSK job grade structure

Every job at GSK is assigned a job grade. GSK's job grading structure consists of several Bands implemented by a group with several grades within Band D (D01 to D06) with D01 being the most senior grade. There are five grades within Band E (E01 to E05) and four grades within Band L (L01 to L04).

7500

| | |
|--|--------------------------------------|
| Business Unit Performance | 0.75 |
| Grade | 0.04 |
| Approved base salary | \$52,000 |
| IPM based on PDP feedback | 1.00% |
| Bonus opportunity based on grade and bonus level | 8% (see Bonus Opportunity on page 3) |
| Calculation: Bonus opportunity % x IPM x approved base salary | 8% x 1.00% x \$52,000 |
| For the previous year: | \$4,160 |

7500

| | |
|---|--------------------------------------|
| Business Unit Performance | 0.75 |
| Grade | 0.04 |
| Approved base salary | \$70,000 |
| Plus actual overtime | in variance = \$1,400 |
| Bonus opportunity based on grade and bonus level | 8% (see Bonus Opportunity on page 3) |
| Calculation: Bonus opportunity % x (base salary plus actual overtime and/or shift pay) | 8% x 1.00% x \$71,400 |
| Actual bonus payment in March | \$5,088 |
| For the previous year: | \$3,888 |

FOUR

NOT JUST BIGGER... BETTER

When you evaluate suppliers of Potassium Carbonate or Potassium Bicarbonate, why does Armand Products Company clearly stand out from other producers? Is it because we are the world's largest producer with four times the capacity of any other U.S. supplier? Or is it because we operate four reactors instead of just one, assuring you reliable supply 24 hours a day, seven days a week, 365 days a year?

Maybe it's because Armand has a wider variety of grades available to meet your specific production requirements. Or because our nationwide distribution network provides fast reliable delivery. Or it could be

our experience; after all, we have been supporting customers with technical service since our formation in 1986.

All things considered, the main reason Armand Products Company stands out is that often we can do things the other producers just can't. Because of our size, flexibility, and experience, we are better able to supply you, better able to serve you and better able to support you.

***Choose Armand Products Company...
and make the clearly better choice.***

- Phone orders are welcomed for immediate delivery.
- The Lenox Club Plan offers you extended, interest-free credit.
- Gift Certificates available.

STERLING SILVER BABY RATTLE, CUP & PORTRAIT FRAME.

SERIES 300 PRESSURE INSTRUMENT VALVES

Whether your application is in the pharmaceutical, refining, nuclear, petroleum, chemical, power generating, or other liquid or gas control system, the need for valves in pressure instrument monitoring is clear. Equally clear is the fact that the proper calibration and inspection of control systems requires instrument valves that deliver precision engineered performance, reliability and cost efficiency. Now available for commercial industry, Technical Products Series 300 Instrument Valves offer unsurpassed high quality as a result of the rigorous and stringent military specification processes demanded for qualification by the U.S. government.

SUPERIOR DESIGN AND CONSTRUCTION

Technical Products Series 300 Instrument Valves are the product of an advanced third generation design, providing a simplified construction which offers high reliability for liquids or gases at pressures up to 6000 PSI. Each valve is constructed of the highest quality materials, in accordance with military

specifications—Standard materials for the body, bonnet, and stem are either stainless steel or nickel-copper alloy. Every Series 300 Instrument Valve must also pass a series of rigorous quality assurance tests for shock, vibration, and structural soundness.

The Series 300 Valve's superior design is evident throughout its construction—The stem moves through the valve body, reducing wear; a metal-to-metal back seat prevents the stem from backing out of the valve body; system pressure causes the o-ring to isolate the bonnet during valve cycling; the ergo-

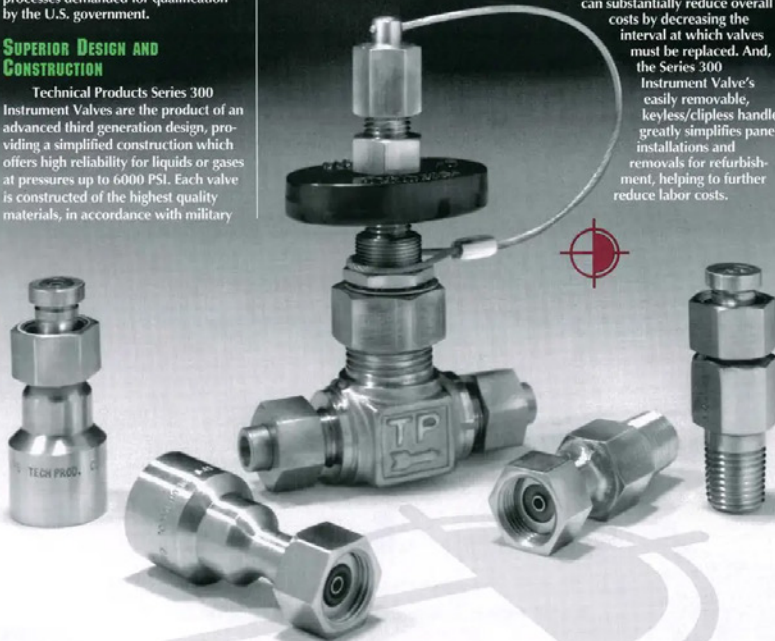

nomically designed aluminum handle provides for fast and precise opening and closing of the valve; and a straight-bore flow path delivers fluid with minimal turbulence.

UNMATCHED COST EFFECTIVENESS

Thanks to their advanced, simplified design, Series 300 Instrument Valves are easy to disassemble and are completely refurbishable. No special tools are required for removal of the valve stem, and replacement stems and other wear items are always in stock and available. This capability, unique to Technical Products' instrument valves,

can substantially reduce overall costs by decreasing the interval at which valves must be replaced. And, the Series 300

Instrument Valve's easily removable, keyless/clipless handle greatly simplifies panel installations and removals for refurbishment, helping to further reduce labor costs.
